STEM 207 POWERED BY COLISEUM STEM • SPORT • LEARN

Brand Guide

STEM 207, powered by STEM Coliseum and Learning Center · Version 1.0 · October 2026

Keep the humanity in technology.

STEM 207 is Maine's STEM explorer for grades 2–8. This guide covers how STEM 207 and its parent, STEM Coliseum, appear together. For STEM Coliseum's own materials, follow the STEM Coliseum Media Brand Guide v1.1.

1. Who we are

STEM Coliseum and Learning Center is the parent company. Tagline: **STEM • SPORT • LEARN**. Website: stem-coliseum.odoo.com

STEM 207, LLC is a program offered exclusively through STEM Coliseum. Its mission is **Keep the humanity in technology.** Use those exact words, with the period.

How to say it

Use	Wording
Next to the logos	STEM 207 *powered by* STEM Coliseum
Legal or formal line	STEM 207, LLC is a program offered exclusively through STEM Coliseum and Learning Center.
Short reference	STEM 207, powered by STEM Coliseum

The lockup

The STEM 207 logo leads, then "POWERED BY", then the full-color STEM Coliseum logo. Always on white.

Where it appears

- **Website:** a white brand row on every page, with the STEM Coliseum logo linking to the STEM Coliseum site. The footer carries the legal line.
- **Sign-in and certificates:** "Powered by" with the STEM Coliseum logo.
- **Flyers, posts, partner sheets:** the horizontal lockup at the top or bottom, plus the mission line.

2. Logos

STEM 207

The pine tree forms the right edge of the M, and the zero holds the state of Maine. "STEM" is Dark Teal and "207" is Green 2. On dark backgrounds, use the reverse version with white "STEM".

- Minimum size: 120 px wide on screens, 1 inch in print. Use the mark (the Maine "0") for icons and favicons.
- Clear space: keep at least the height of the "S" in STEM empty on every side.
- Use the SVG files when you can; PNGs are 2000 px wide.

STEM Coliseum (parent)

- Use the original files only. Never recolor, stretch, redraw, or add shadows, glows, or outlines.
- Full-color versions go on white or light backgrounds only. Use the reversed (white) versions on Dark Teal.
- Clear space equals the height of the "C" in COLISEUM. Minimum 120 px wide on screens, 1 inch in print.
- The supplied files are 700 px wide. Ask the STEM Coliseum media team for SVG or high-resolution originals for print or large signs.

3. Color

STEM 207 uses the STEM Coliseum palette. Use no more than three brand colors in one layout. STEM 207 normally uses Dark Teal, Teal, and Green 2.

Dark Teal #012d2b
RGB 1, 45, 43 · Anchor: dark backgrounds, main text, "STEM"

Teal #03968f
RGB 3, 150, 143 · Large headings, borders, graphics

Green 2 #94c93d
RGB 148, 201, 61 · Calls to action, "207"

Text teal #037872
RGB 3, 120, 114 · Small text, links, buttons

Blue #3b8bcb
RGB 59, 139, 203 · Interactive highlights, sparingly

Body gray #555555
Body and muted text

> **Readability note.** Teal and Blue measure about 3.6:1 against white. That's fine for large headings and graphics, but small text needs 4.5:1 (WCAG AA). For small text, links, and button labels, use Text teal #037872 (5.3:1). On Green 2, always use Dark Teal text.

Parent-brand extras

Green 1 #66aa44 · Orange 1 #fac01b · Orange 2 #f68922 · Pink #ec008c. These appear in the STEM Coliseum logo and parent materials. Never put Pink on Orange or Yellow. Never put Dark Teal on a dark background.

4. Type

Font	Use for
Montserrat (Bold, SemiBold)	Titles, headings, navigation, buttons, and the "POWERED BY" line
Open Sans (Regular, Bold)	Body text, captions, and form fields

Both are free from Google Fonts. Use no other typefaces, and never stretch or condense type. (This PDF was built where the brand fonts weren't installed, so it shows a similar sans-serif.)

5. Voice and imagery

- **Voice:** warm, curious, and plain-spoken. Short sentences for grades 2–8. Lead lines: "Wonder what you could make." and "Your idea. Give it a go."
- **Maine roots:** pines, coast, lighthouses, and harbors next to inventive technology.
- **No people in STEM 207 images,** and never students' faces. (STEM Coliseum's own photos of real students need parental consent on file.)
- **Concept art is illustrative.** AI-generated artwork must not be presented as real facilities, equipment, or programs.
- **Only confirmed offerings:** advertise coding, AI, VR, or AR sessions only when they're confirmed.

Do

- Pair the STEM 207 logo with "powered by" and the STEM Coliseum logo on shared materials.
- Put full-color logos on white, and reversed logos on Dark Teal.
- Use the mission line exactly: Keep the humanity in technology.
- Check contrast: 4.5:1 for small text, 3:1 for large text and graphics.

Don't

- Recolor, stretch, redraw, or add effects to either logo.
- Put a full-color logo on a dark or busy background.
- Use more than three brand colors in one layout, or Pink on Orange or Yellow.
- Use the old indigo and lime STEM 207 colors. They're retired.

What's in this kit

- **logos/stem-207:** logo and reverse logo (SVG and 2000 px PNG), and the mark.
- **logos/lockups:** STEM 207 powered by STEM Coliseum, horizontal and stacked (PNG on white).
- **logos/stem-coliseum:** the nine approved STEM Coliseum versions, as supplied.
- **colors:** the palette as CSS and plain text.
